Introduce your patients to 21st century hair removal with excel HR™

Contact your local CUTERA representative today.
888 4-CUTERA • www.cutera.com

Proven Innovation

Long-pulsed 1064 nm (Nd:YAG) is considered the safest wavelength for hair removal in skin types IV-VI.
Sapphire contact cooling is superior for laser hair removal—allows matching and compression of nearby tissue layers to maintain consistent and sufficient energy throughout the pulse duration.
The only high-power Alexandrite laser with true contact cooling.

Versatile and acclaimed Nd:YAG clinical utility.

Recognized performance for the treatment of leg veins.

The only high-power Alexandrite laser with truecontact cooling.

Superior Safety and Efficacy

To effectively target deep follicular structures and deliver energy more efficiently, excel HR utilizes index matching and compression via sapphire cooling contact. The result? Enhanced hair reduction efficacy using less fluence with improved patient comfort.

Compressive shockless distance to follicular target structures for more efficient targeting

Epidermal protection is of heightened concern when treating darker skin types—contact cooling is preferred due to its parallel cooling abilities.4 excel HR’s sapphire contact cooling offers continuous cooling before, during and after each laser pulse maximizing patient comfort and minimizing risk of under-cooled and over-treated areas—the epidermis is protected with each and every pulse.

Another First from the Pioneer and Leader in Nd:YAG laser technology excel HR™ combines high-power 755 nm Alexandrite and the wide-range versatility of proven 1064 nm Nd:YAG with the superiority of sapphire contact cooling to offer the most advanced premium hair removal solution for all skin types.

Modern Ergonomics

Modern ergonomic design delivers a more-refined handpiece that feels like an extension of your hand. By goodform to body transparencies seamlessly paired with external chilling hoses, lasers with long warm-up times and constant re-calibration, limited parameters, and fragile fiber delivery.

Performance & Efficiency
- High-performance dual-wavelength laser system (755/1064)
- Proprietary truWAVE™ technology
- Real-time refrigeration means access to all parameters without recalibration or delays
- Quick warm-up time and quiet, quiet sound level
- Variable spot-size delivery

Versatility & Convenience
- Max variable and pigmented indications
- Motorized spot-size adjustment for seamless transitions
- Real-time calibration by touch screen, no need to recalibrate
- Robust, extra-long fiber for optimal reach and easy patient access

Value-added & Security
- NO consumables
- NO per session, per shot, per patient costs
- NO cost for damaged or broken fibers*
- NO cost for flashlamp replacement*
- One-year comprehensive warranty

Economic by Design

Modern design brings economic efficacy. What is your true cost of ownership? CUTERA proudly offers the excel HR system with an unmatched, comprehensive bumper-to-bumper warranty—with NO running expenses.
