**blink intensive tears**

Eye drops helps bring long lasting relief from irritated, dry feeling eyes

- The hypotonic formulation lowers the tear film osmolarity¹
- Contains a lubricating demulcent to soothe and protect
- Viscosity enhanced for a longer lasting effect - can hold moisture in the eye for more than 60 minutes with less blurring²,³

---

Available in both 20 vial unit dose and 10ml multi-dose presentations
Hypotonic **blink intensive tears** eye drops helps to stabilise the tear film – breaking the negative cycle of ocular irritation\(^1,4,5\)

**Cycle of ocular irritation**

- Inflammation can result in reduced tear production, thereby increasing tear film osmolarity and potential ocular surface damage\(^6\)
- Drying environments take moisture from the eye increasing tear film osmolarity\(^7\)
- Results in the release of inflammatory agents

**Hypotonic blink intensive tears** eye drops helps maintain the tear film osmolarity better than other eye drops\(^1\)

Demonstrated to hold moisture in the eye for over 60 minutes for lasting comfort and less blurring\(^2,3\)

Recommend **blink** eye drops and delight your patients’ dry feeling, tired eyes.
